Welcome Message

from the Organising Committee Chairperson

For the first time ever, the National Conference for Clinical Research (NCCR) carries greater meaning. As a public health physician, I humbly lead by example, echoing the resonating conference theme of "Quantum Leap in Research Leadership." The theme of our conference represents our collective aspiration to push the boundaries of knowledge and innovation in the realm of clinical research. It symbolises our determination to take a giant leap forward in our pursuit of transformative breakthroughs that will shape the future of healthcare. The conference will also be held in conjunction with the momentous 20th Anniversary of the Clinical Research Centre, Sarawak General Hospital and the Sarawak State Research Day.

We have meticulously curated an exceptional lineup of esteemed speakers and experts who will share their invaluable insights, experiences, and cutting-edge research findings. Our program encompasses a diverse range of topics, including advancements in medical therapeutics, novel methodologies, and the ever-evolving role of leadership in research.

We are fortunate to be living in an era where scientific discoveries are flourishing at an unprecedented pace. From groundbreaking treatments to revolutionary diagnostic tools, the landscape of clinical research is constantly evolving. However, with progress comes the responsibility to foster effective research leadership that can harness the full potential of these advancements and translate them into tangible benefits for patients around the world.

As we embark on this remarkable journey together, I urge you to make the most of this conference. Engage in the lively discussions, challenge conventional wisdom, and explore novel perspectives. Let us remember that our collective efforts today will have a lasting impact on the future of clinical research and, ultimately, on the lives of those we strive to serve.

Thank you, and I wish you all a fruitful and memorable conference experience!

Datin Dr. Sheamini Sivasampu
Organising Committee Chairperson

Message from the Scientific Committee Chairperson

The 16th National Conference for Clinical Research 2023, held in conjunction with the 20th Anniversary of the establishment of the Clinical Research Centre, Sarawak General Hospital and the Sarawak State Research Day carries a theme that resonates with what Clinical Research means today for Malaysia - a quantum leap in research leadership.

In recent years, the Institute for Clinical Research, together with its 37 Clinical Research Centres at Hospital level, achieved significant progress by generating data and providing vital information that shapes clinical care and health policy.

The 16th NCCR embodies all that is exciting and relevant to clinical research today, drawing upon the experience and skills of all stakeholders. This will be reflected in the scientific and social programme - incorporating cutting edge topics and novel approaches to clinical research, delivered by a world class Faculty, over 3 days.

On behalf of the Organising Committee, I welcome you to the 16th NCCR in Kuching, in the Land of the Hornbills.

Dr. Alan Fong
Scientific Committee Chairperson
